Warren B. Johnson

300 Noah Place McDonough, Georgia 30252| 6783724045| warrenjohnson1410@gmail.com | US Citizen

Objective

Electrical Engineering Student seeking a Summer 2027 internship with a proven track record in data analysis, CAD Modeling and Design, and technical problem-solving. Seeking an internship or entry-level position where I can apply my proficiency in programming languages and hardware platforms to support engineering teams in developing efficient, high-performance solutions.

Education

Georgia Institute of Technology | Atlanta, GA *August 2026 – Present*
Bachelor of Science in Electrical Engineering Expected Graduation, May 2030

Skills / Certifications

Autodesk Certified User: Revit and AutoCAD

- Certified skills in Revit modeling, CAD modeling, technical documentation, floor plans, and elevations

Programming Certifications: HTML5, CSS3, JavaScript, and Python

- Certified skills in writing and debugging in the languages listed above.

Hardware: Raspberry Pi
Software: Revit, Inventor, AutoCAD, Homestyler, Sketchup, GitHub
Professional Organizations: National Society for Black Engineers
Communication: Design proposals, technical reports, public speaking, presentations (large and small audiences)

Experience

JET Logistics | McDonough, Georgia *July 2023 – August 2025*
Data Entry and Analysis
Line-haul transportation logistics and driver-route optimization

- Engineered and optimized automated data collection pipelines for driver-route performance reports, reducing manual data entry errors by 90% and accelerating analysis turnaround time for route validation reports.
- Analyzed large-scale operational datasets from automated material handling systems to identify power driver-route bottlenecks, contributing to an 8% improvement in driver efficiency.

Projects

Architecture and Engineering Design Portfolio | UGHS *Spring 2026*
Curate a portfolio of my greatest Engineering and Architecture work

- Spearheaded the design of award-winning architecture and engineering systems, earning First Place in the American Institute of Architect's design competition through rigorous technical planning and execution.
- Engineered precision CAD models for advanced mechanical applications, producing detailed structural and mechanical components for an amateur rocket project.

Relevant Coursework

Advanced Architectural Drafting and Design: Design of architectural structures and household energy systems, CAD modeling of engineering parts, Understanding of architectural and electrical standards
Introduction to Computing: Python Interactive Web Dev and Robotics
